

Greetings Parents and Caregivers,

Welcome to Elevate K-12 Special Education LIVE!

The Elevate K-12 Special Education LIVE program connects highly qualified online Special Education teachers from across the United States to students in a flexible, engaging instructional setting.

Your child will receive instruction from an Elevate Special Education teacher to ensure the best possible education, tailored to meet your child's needs. Classes that use Elevate K-12 are conducted live on campus at designated times, just like any other class. Our teachers have an average of 14 years of experience and the passion needed to help your child master essential skills and concepts that will foster future academic success. Instruction is provided by certified teachers in small groups, with an emphasis on academic development, confidence-building, and compliance with IEP requirements. Teachers may assign homework and administer tests and quizzes regularly to evaluate student progress. At the same time, an in-person Classroom Coach provides all necessary materials, resolves any technology issues, monitors classroom behavior, and encourages active participation.

Elevate teachers and coordinators work closely with school staff to match instruction to student needs through:

- Differentiated teaching to encourage progress
- Regular data collection and reporting
- Collaboration with special education teams to adjust lessons
- Small-group settings for focused support

Tips to Help Your Child Succeed

- Engage with your child about their Elevate classes, just as you would with any other class. Asking questions like "What is something new you learned today?" or "What did you cover in your Elevate class today?" helps students reflect on their lessons and can inspire meaningful discussions at home.
- Maintain regular communication with your school's special education team to receive updates on your child's progress and to discuss any additional support needed.

About Elevate K-12

Elevate K-12 is passionate about creating remarkable teaching and learning opportunities for students and teachers. We are on a mission to make high-quality teaching accessible to all students, regardless of their location. Our program is designed to deliver primary instruction, using technology to connect students with expert, certified teachers. To date, we've taught more than 350,000 students in over 2,000 schools across 600+ districts.
